Support

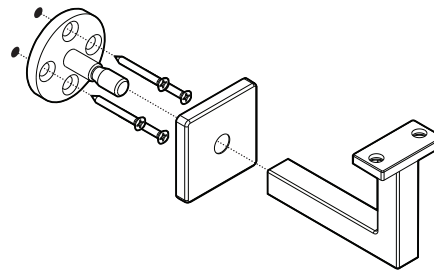

1

Locate studs, mark holes on wall and rail, and drill holes.
Ubique los montantes, marque los agujeros en la pared y el riel, y perfora los agujeros.
Localisez les montants, marquez les trous sur le mur et le rail et percez des trous.

2

Secure base with wall screws, then install trim and bracket.
Asegure la base con tornillos de pared, luego instale la moldura y el soporte.
Fixez la base avec des vis murales, puis installez la garniture et le support.

3

Secure rail to bracket with rail screws. Then adjust alignment of bracket and tighten set screw securely.
Asegure el riel al soporte con tornillos para riel. Luego ajuste la alineación del soporte y apriete firmemente el tornillo de fijación.
Fixez le rail au support avec des vis de rail. Ensuite, ajustez l'alignement du support et serrez fermement la vis de réglage.
